

---

The firmware modem provides you with the easiest way to update your Huawei E1733u-1, E173u-1, E173e-1. The modem is powered by 2xA/B USB port and 1xUSB mini port so you can update the firmware without needing a power adapter. And this version is compatible with 3G or 4G networks. As an added bonus, all data used for updating will be saved in the DCIM folder on your memory card so you won't have to worry about losing anything else while updating! Handsets are always being updated with new features and attributes that offer increased functionality. Updates are essential for maintaining device performance and security of your investment at its highest level. Updates vary in size and availability, it's important to be aware of what you're downloading and where you're uploading it to. Make sure the software you are using is from a reputable source. If your provider or manufacturer provides an upgrade, ask if they require a different firmware file to be downloaded. This should not affect your upload speed, keeping this service at your convenience. The Huawei E173 is a entry level 3G mobile phone developed by Huawei, the Chinese multinational manufacturer of telecommunications equipment and devices, headquartered in Shenzhen, Guangdong. The E173 was released in 2011 along with the Huawei E172s which is very similar but lacks Wi-Fi support. The Huawei E173 3G mobile phone supports UMTS 2100 MHz FDD-B1/B2/B4 networks and is designed to work on a GSM 900/1800 MHz network. This device comes with a 2.4 inch TFT display, a 600 MHz single core processor and the user interface is made up of a series of menu options. It has 256 MB of on board memory which is expandable with the use of a microSD card which can support up to 32GB in size. The built in storage allows the user to store several types of files such as photos, music & videos. The E173 is a quad band, tri-band and penta-band 3G handset that comes equipped with WiFi, Bluetooth and GPS support. The E173 is preloaded with the mobile phone standard applications which include, SMS, MMS, video calls, Facebook Chat and Gmail. The internet browser supports HTML5 which allows you to view the mobile version of any website. There are also game download services offered in this device which can be accessed by connecting the handset to the PC via USB cable. An external antenna is included for wireless communication in areas where reception is weak or non-existent. For those who travel frequently, the E173 comes with a modular type battery to cut down on travel weight. The battery can be removed from the unit and either re-charged or replaced as needed. It comes with a microUSB port to allow for easier charging, as well as a separate charging cable which is also compatible with other Huawei models. The Huawei E173 3G mobile phone comes in several different color options including black, white & pink, red & pink and white & gold.
